"What's the most fun you've ever had playing soccer on PlayStation 4? I'd say I bet you it involves a player's dynamic running, jumping and acceleration," said David Rutter, SCEE's director of global product marketing. "That's what 'HyperMotion Technology' captures, and is what we've been able to apply directly to football. With Fifa 22 Activation Code, we believe we've harnessed years of research to add a noticeable boost of realism and the kind of excitement you've only ever experienced playing on PlayStation." "Fifa on PlayStation is about authenticity. We've always sought to make the game feel more real using different animation techniques to better capture the player's speed and movement and the way they interact with the ball. But to put it simply, we're bringing our player's movement closer to life." With over 100 new features and enhancements, FIFA 22 will once again have you in the action, on the pitch, in all-new lighting and weather effects, team tactics, and more. These advancements will give you a true sense of what you'd feel like playing against the pros. "Because FIFA is a game that's built around heart-pounding, physical action, we've gone back to our roots and asked ourselves how we could enhance our player motion in ways that would add a better sense of realism and authenticity," continued Rutter. "From the way players move their hips and kick with their whole body to how their sprints feel, we've pushed players even further to be the most realistic athletes on the pitch." Key FIFA 22 features include: FIFA 22 includes an all-new game engine which allows teams to control the pacing and intensity of matches. The toolbox puts in-game tactics and game settings in the player's hands, providing access to new team and player skills, tactics, and game set-ups. Proven gameplay systems have been enhanced with all-new AI logic. Deep Impact engine features an update to tactical awareness with nuanced collective intelligence across the pitch. A new soundtrack from celebrated British composer and A-list film composer Harry Gregson-Williams (Star Wars, The Dark Knight

What's new in Fifa 22:

- **Fifa 22 is the most complete, authentic, and connected football game in franchise history. It is the first in the franchise to use EA Trax technology, delivering authentic-sounding crowds and improved ball physics for the truest-to-life interactions on the pitch.**
- **Fifa 22 features new improvements to the Authentic One-on-One Seasons, Pro Clubs, and Movements. Whether you play alone or with friends, Fifa 22 delivers more choices for how you play.**
- **Fifa 22 includes enhanced AI which makes teams play with a new level of complexity to unpredictable situations on the pitch.**
- **Fifa 22 introduces the "Trust Factor" in Pro Clubs. Winning challenges and scoring goals will earn more players for your Club. You can also improve specific attributes by using Practice to improve strength, speed, and stamina.**
- **Fifa 22 introduces the most authentic audiovisual experience in football games. Every nuance of the game has been tweaked to add a more polished feel, and hear the crowd sing, cheer, and boo. All new stadiums are immersive. Whether you play in an English Championship match, Danish Superliga, or Copa Libertadores, the authentic sound of stadiums add an authentic feel to every match.**
- **Fifa 22 features a new authentic kits engine, which has further taken the customization of player kits to a new level. Now, as players wearing your authentic kit, you can choose three different kit styles with a simplified kit creation tutorial where you can create your own customizable kits.**
- **Fifa 22 introduces a new set of animations on the field to better reflect each of the players' sprint, dash and tackle performances. Players also react and drift around the penalty area with more intensity and nuance.**
- **True-to-life gestures and animations on the field add to the in-game chemistry and create more believable players.**
- **Players make better decisions for scoring a goal.**
- **Fifa 22 introduces all-new animations for camera cuts when players gain possession of the ball. Players will now make smarter decisions as to which way they should turn toward a free-kick or dribble when an opportunity arises. You will also see how a player truly feels for taking each action in the game such as how his legs feel after a quick turn or how he is feeling about scoring a goal after receiving it.**
