Can I use all Photoshop features in Elements? Yes, you can use all of the features of Adobe Photoshop in Photoshop Elements. Elements has an interface different from Photoshop so you'll still need to become familiar with Elements (and the possibilities) to use it efficiently. You can download the free Elements 15 to learn the new interface. If you want to use professional-grade features, such as non-destructive editing, adjustments and plugins, you must use the full version of Photoshop. How do I back up my Photoshop Elements documents? Your Photoshop Elements documents are stored on your computer and can be backed up to the cloud. To back up the documents using the Cloud, go to the File menu and select "Back Up to Cloud Drive." To back up your documents using a local drive, select the File menu > Export and choose "Export as cloud backup file." In Photoshop Elements 20, a backup function appeared on the File menu and the "Backed Up to Cloud Drive" dialog box appeared at the top of the Elements window. The backup dialog box will show a box similar to this one. Click on the "Export to cloud" button and the files will be automatically backed up to the cloud. You can opt to back up only certain types of files. You can also back up to a designated folder (or the default location) on your computer. Can I import Photoshop files into Elements? Yes, you can import Photoshop files into Elements. The photos that you create in Photoshop Elements can be imported back into Photoshop, saving you the time and effort to transfer your work into Photoshop after all of your work in Elements. To import a Photoshop file into Elements, go to the File menu and select "Open." Are there things that I can't do in Elements that I can do in Photoshop? After you learn how to use Elements, you can use it effectively. However, if you are looking to do certain things you cannot do using Elements. If you are looking to do things such as non-destructive edits, adjustments, text and vector effects, you need to use Photoshop. What software should I use to create images for websites and social media? You don't need to use Photoshop, but you can if you want to do more. Create something in Elements or use other image editing software such as the free GIMP 05a79cecff

Create a Custom Watercolor Brush As you'll learn in a moment, you can apply custom brushes in Photoshop. Create a custom watercolor brush by following these steps: 1. Choose the Brush tool, and press and hold either the shift key, or click on the Brush tool in the main menu bar. 2. Choose **Brush** from the Brush drop-down menu. 3. At the bottom of the brush palette, you see a small brush-color selection. The Default set is being used. 4. Click on the color box. The color palette shows you the brush you just selected. 5. You see a little thin line appear on the selected color. 6. Click outside of the color box. A + appears at the right end of the brush. This lets you determine how much color you want to use. Simply drag the + on the color box to move the color. 7. When you're happy with the size and the color, click the end of the brush. After you create your custom brush, click the **Brush** icon in the main menu bar. This opens the Brush drop-

Supported OS: Mac OS X 10.7 Lion or higher Windows 7 or higher Software Requirements: Note: This app uses a lot of fonts. Mac users can check their fonts folder for fonts used by the app and purge them. Windows users will need to check the registry for any fonts used by the app and remove them from there. Note: As this is a free software, we can’t guarantee that it will work as advertised. Please, note that some time ago, we have been using the Display Settings app (or
